Achievement scores

The sum of your individual Coherence Scores during the length of a session.

It can be improved by achieving higher Coherence Scores and the length of time spent in Coherence during the session. It is the total of all Coherence. The scoring algorithm updates your Coherence Score every 5 seconds during an active session and adds them together giving you a sum which is called Achievement on the app displays. You may want to set a daily Achievement Goal for yourself, an Achievement Score of 300 points per day is a good place to start. This could be accumulated in a single session or split across two or more sessions depending on your schedule or preferences.
